CARGO

The most environmentally friendly RoPax in the World

We offer the fastest and most environmentally friendly Cargo connection between Finland and Sweden with the world's most environmentally friendly Ropax Ferry Aurora Botnia.

Wasaline's M/S Aurora Botnia takes you between Umeå in Sweden and Vaasa in Finland in only 3.5 hours. This is the shortest sea route between Finland and Sweden. We operate daily, all year round.

Aurora Botnia

The ferry has a cargo capacity of 1,500 lane meters and it takes 800 passengers. It is designed to be environmentally friendly, with a machinery running on a dual fuel solution. Besides liquified natural gas (LNG) it can also operate on biogas (LBG). The vessel can run on battery power for port entry and departures, peak shaving, hotel load and to boost power. Aurora Botnia has electric propulsion drives with Azimuth thruster units (pods). In harbors the vessel is charged with green electricity.

Aurora Botnia is the first passenger ferry built with DNV Clean Design notation. This means that there are rules and regulations to be applied according to this notation during the construction of the vessel that makes the vessel even more environmentally friendly.

Main dimensions

Loa: 150.0 m

Lwl: 137.8 m

Beam mld.: 26.0 m

Draught, design: 6.10 m

Deadweight, design abt.: 3 500 t

Max. persons onboard (LSA): 1 000

Capacities

Passengers: 800

Lane metres: 1 500

Cabins: 68

Speed: 20 kn

Public Decks: 2

Height: 4,9 m

Aft Ramp: 15 m

Fore Ramp: 6 m

All kind of Cargo transport all year round, several times a day

Aurora Botnia is IMDG certified and has two cargo decks. In addition, the weather deck of the ship gives the possibility to transport dangerous goods.

Special Transports and Heavy Cargo

With Aurora Botnia we have the possibility to transport heavy and special transports. Thanks to a 15-meter-wide aft ramp with the height of 4.9 meters we can load many kinds of special transports. The ramps are made and built for heavy cargo transports. You can always contact us for special requests or to find out more.

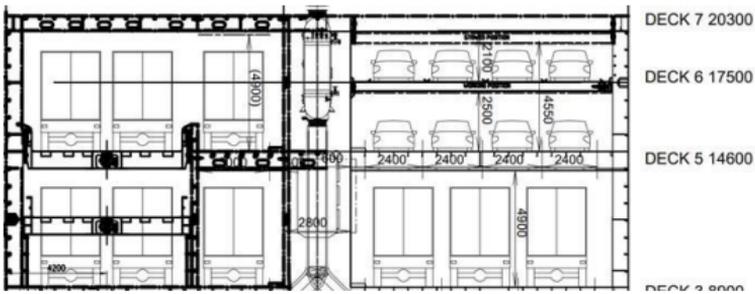

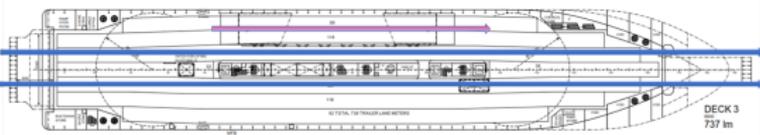

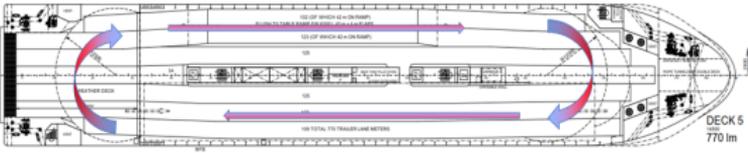

IMO classes

- 1.4S Small Arms Ammunition
- 2.1 Flammable Gas
- 2.2 Non-Flammable Gas
- 2.3 Poisonous Gas
- 3 Flammable Liquids
- 4.1 Flammable Solids
- 4.2 Spontaneously Combustible Solids
- 4.3 Dangerous when Wet
- 5.1 Oxidizing Agent
- 5.2 Organic Peroxide
- 6.1 Poison
- 8 Corrosive
- 9 Miscellaneous

Capacity

Thanks to our two Cargo decks and a frequent timetable we can ensure capacity for our customers all year round, even during the peak summer months.

Reefer plugs

On Aurora Botnia there are more than 50 reefer plugs available on the cargo decks. This means that even the thermo transports between Finland and Sweden remain high quality.

Intermodal transports

There are excellent train connections from the port of Umeå that carry your cargo to other parts of Scandinavia or mainland Europe. We believe that intermodal transports are part of the logistics of the future. Containers or Huckepack trailers can easily be transported from Vaasa to many parts of the world without a driver.

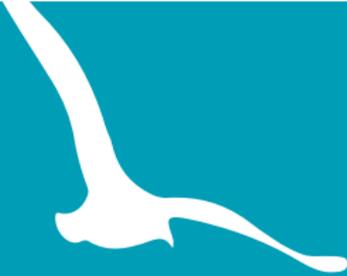

Service on board

Aurora Botnia is a unique environmentally friendly passenger ship. You can enjoy your meal at the Archipelago buffet, the à la Carte restaurant or simply in the café. On the vessel you can also find a shop and a modern conference department. If you want to rest during the trip you can book a cabin.

Cargo web

Thanks to our Cargo Web it is easy to book a transportation with us once the customer account is set-up and login information is sent to the customer. We also have the possibility to offer our customers direct integration as we provide open interfaces to our reservation system. Would it not be efficient and convenient to book the ferry transportation directly in your own transport system?

“Wasaline offers good and reliable service. During our years together we have developed a long and well-functioning cooperation. We can highly recommend Wasaline to other companies.”

Berndt Björkholm
Director, Freight Forwarding, Backman & Trummer

“We have collaborated with Wasaline for many years. The cooperation and communication have always worked well and we can count Wasaline as a partner who listens to us and strives to improve the cooperation.”

Andreas Lindedahl
Director, RL Trans

A dash better.
